# Ensuring Pool Water Quality with High-Precision Test Strips

## Our Top Products for Pool Water Testing

Maintaining optimal water quality in swimming pools is crucial for safety and enjoyment. MACHEREY-NAGEL's high-quality test strips offer easy monitoring of essential parameters for clean, safe water. Made in Germany, our test strips are reliable tools for both pool operators and homeowners.

### All-in-One Pool Test Strips

The 5-in-1 test strips (REF 90759) measure five key parameters:

- Free Chlorine (0–10 mg/L): Ensures proper water disinfection.
- Total Chlorine (0–10 mg/L): Helps detect chloramines for a healthier swim environment.
- pH (6.4–8.4): Optimal range prevents skin irritation and improves chlorine efficiency.
- Total Alkalinity (0–240 mg/L CaCO<sub>3</sub>): Prevents rapid pH swings.
- Total Hardness (0–1000 mg/L CaCO<sub>3</sub>): Protects equipment from scaling and corrosion.

### QUANTOFIX® Phosphate 10

Phosphates promote algae growth, making pool water green and cloudy. Our patented QUANTOFIX® Phosphate 10 (REF 91356) test strips allow you to measure phosphate levels without the need for additional reagents. This makes it easy to prevent algae issues and keep your pool water clear and clean.

- Phosphate: 0 · 0,5 · 2,0 · 5,0 · 10,0 mg/L PO<sub>4</sub><sup>3-</sup>

### Cyanuric Acid Test Strips

Cyanuric acid stabilizes chlorine, protecting it from degradation by UV light. However, excessive cyanuric acid can diminish chlorine's effectiveness. Our Cyanuric Acid Test (REF 90710) provides a simple and accurate way to monitor cyanuric acid levels, ensuring the ideal balance for optimal chlorine performance. Regular testing helps maintain clean and safe pool water.

- Cyanuric acid: 0 · 50 · 100 · 150 · 300 mg/L Cya

### Custom OEM Solutions

Looking for personalized test strips? MACHEREY-NAGEL offers a range of OEM options, customized to your needs. Choose from various parameters, including:

- |                 |                  |                    |
|-----------------|------------------|--------------------|
| ▪ Free Chlorine | ▪ Total Hardness | ▪ pH               |
| ▪ Bromine       | ▪ Cyanuric Acid  | ▪ Total Alkalinity |

Whether you need a unique design, different packaging, or specific configurations, we've got you covered! Available with or without folding boxes, we offer various packaging solutions.

### Looking for a simpler option?

Our 3-in-1 pool test strip (REF 90752) provides a simpler solution for basic testing, measuring:

- Free Chlorine
- pH
- Total Alkalinity

### Proudly Manufactured in Germany

All MACHEREY-NAGEL test strips are produced in Europe, meeting the highest quality standards. Our German-made products guarantee accurate, consistent results trusted by pool professionals worldwide.
