

MACHEREY-NAGEL

# Sustainability statement

MACHEREY-NAGEL

August 2025

## Foreword

MACHEREY-NAGEL is a family-owned, medium-sized company, that has always been committed to fostering a culture of partnership and collaboration with its employees and business partners since its establishment in Düren in 1911. We are committed to social, environmentally conscious and responsible behavior. These principles are part of the Code-of-Conduct and are active drivers in our actions.

With this statement, MACHEREY-NAGEL emphasizes its strong commitment to sustainability.

MACHEREY-NAGEL is a manufacturer of products for chemical and biomolecular analysis, from raw materials to finished products. Sustainability is an important subject here. For example, the products manufactured are used for quality control of important resources such as water and food. In addition, MACHEREY-NAGEL manufactures a range of in-vitro diagnostic products that are actively used in the healthcare sector.

**Guideline**

MACHEREY-NAGEL approaches to sustainability are based on the concepts of environment, social, governance (ESG). The company is committed to the 10 principles of the UN Global Compact and is actively involved in implementing the Sustainable Development Goals (SDGs) developed by the United Nations with the aim of creating a more inclusive and sustainable economy.

**Environment**

Sustainable Development Goal (SDG) 6 – ‘Clean Water and Sanitation’ is particularly relevant for the topic of environment. The products in ‘Water Analysis’ are used, for example, for quality control and to detect environmental pollution and pollutants in water samples. In addition, ‘Chromatography’ products are utilized for food analysis. MACHEREY-NAGEL is a certified waste management company. Here we make an important contribution to the professional disposal of critical reagents. The potential recyclability in the ‘end-of-life section’ of a product, as well as a resource-conserving production process is already considered during product development. SDG 12 – ‘Responsible consumption and production’ is therefore also relevant. MACHEREY-NAGEL endeavors to examine existing

products, the associated processes and raw materials used for substitution and more sustainable alternatives in order to improve sustainability performance.

**Social**

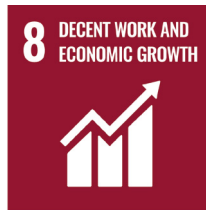

As a family-owned company with close bonds to the local region, our focus is on the well-being and satisfaction of our employees. SDG 3 – ‘Good Health and well-being’ is therefore of significant importance to our company. Occupational health and safety, the prevention of illness and accidents are a top priority for us. We also make an important international contribution to medical care with our products for in-vitro diagnostics. Building knowledge and training future generations (SDG 4 – ‘Quality education’) are essential, especially for a medium-sized company. MACHEREY-NAGEL therefore relies on a comprehensive training program for 14 different professions in almost all areas of the company. These include, for example, industrial clerks, chemical laboratory technicians, mechatronics technicians and warehouse specialists. The almost 700 employees with 26 nationalities and a proportion of women of > 50 % reflect the social values practiced.

# Sustainability statement

## Governance

Compliance with all legal laws, requirements and principles is a matter of course and mandatory for MACHEREY-NAGEL; with its Code-of-Conduct, the company is committed to legally compliant and socially responsible corporate governance. Responsibility lies with the management. In this context, SDG 8 ('Decent work and economic growth') and SDG 16 ('Peace, justice and strong institutions') are particularly relevant.
