Automated urinalysis at the point of care

The URYXXON® Relax provides dependable urine status results to detect early stages of many diseases such as diabetes, kidney disease and urinary tract infections. Instrument-read results have long proven to be advantageous for both, busy health care professionals and patients. URYXXON® Relax readings eliminate the subjectivity of visual color interpretation. The comprehensive interface options and the optimized printouts minimize risks associated with manual transcriptions. Reliable results can be obtained virtually immediate at the point of care. The URYXXON® Relax makes urinalysis simpler and more reliable.

Found to be the most user friendly device by six out of nine first time users within an analytical performance study.

Technical specifications

Instrument memory	200 patient test results including name or patient ID	
Probenmaterial	User:	Touchscreen display, alphanumeric input, password protection
	Computer:	USB B interface for connection to PC alternatively RS232 interface for connection to PC USB A interface for connection of keyboard or barcode reader
Power requirements	110–240 V AC, automatic Battery powered operation (optional) with 6 AA batteries	
Dimensions / Weight	Depth:	20 cm (7.9 inches)
	Width:	16 cm (6.3 inches)
	Height:	7.5 cm (3.0 inches)
	Weight:	710 g (1.90 lb) (without batteries and power supply)
Operation	Temperature range:	10–40 °C (50–104 °F)
	Humidity range:	20–80 % relative humidity, non condensing
	Calibration:	Automatic, self calibrating
Capacity	50 strips per hour	
CE	CE labeling according to Conformity with the European IVD Regulation 2017/746	

Field of application

The URYXXON® Relax is intended for the instrumental evaluation of URYXXON® Stick 10 urine test strips. It is designed for the semi-quantitative detection of blood (occult), urobilinogen, bilirubin, protein, nitrite, ketones, glucose, pH, specific gravity and leukocytes in urine specimen.

URYXXON® Relax and URYXXON® Stick 10 urine test strips are CE IVD labeled according to IVD Regulation 2017/746.

Also suitable for the evaluation of microalbumin test strips.

7 convincing features for optimized usability

Contact free operation

After placing the strip on the instrument, the measurement starts automatically. No further action is needed which makes the operation easy and clean.

Graphic display

On the 320 x 240 pixel graphic screen results for all 10 parameters are conveniently displayed on one page. Pathological results are clearly marked which makes further diagnostic decisions straightforward.

Touchscreen

Operation with touchscreen makes using the instrument a real pleasure. All functions can easily be accessed with a dip on the screen. Optionally an external keyboard can also be connected, so patient names can be comfortably introduced.

Interface options

The instrument carries an USB as well as an RS232 interface. It can easily be connected to existing laboratory information systems.

Small footprint for mobile operation

Due to the small footprint of only 16 x 20 cm mobile use of the device is highly comfortable. Combined with the option for battery operation this is the ideal instrument at the point of care.

Power supply with batteries possible

Optional battery operation enables to use the instrument wherever it is needed. Of course the instrument can also be powered using a 110/240 V autoswitch mains adaptor.

Memory for 200 measurements

Up to 200 measurements can be stored. Using internal functions positive readings can easily be filtered out, enabling further diagnosis when necessary.
