NucleoBond® RS 50	743503
NucleoBond® RS 100	743504
NucleoBond® RS 200	743505

Dear valued customer,

Thank you for choosing MACHEREY-NAGEL for your application. We have attached a short protocol for your review.

To obtain the best results we recommend to follow the detailed protocol available online, especially when you are a first time user of this kit.

All important links to the above mentioned products are listed in this leaflet.

Important information regarding products components, specifications, safety instructions, and processing protocols, can all be found on the product website and accessed easily via the QR code.

QR-Code product website

[qr.mn-net.com/qr/\(241\)743505](https://qr.mn-net.com/qr/(241)743505)

Use the following QR code or the link below for direct access to the user manual.

QR-Code user manual plasmid purification

[qr.mn-net.com/qr/\(IFU\)743505](https://qr.mn-net.com/qr/(IFU)743505)

QR-Code user manual RNA Clean-up

[qr.mn-net.com/qr/\(IFU\)743502](https://qr.mn-net.com/qr/(IFU)743502)

It is strongly recommended to read the detailed protocol section of the user manual if using the kit for the first time. However, experienced users may refer to the protocol at a glance. The protocol at a glance is designed to be used only as a supplemental tool for quick reference while performing the purification procedure.

We are constantly improving our products and we reserve the right to make changes or additions to protocols. Please check for updated revisions for previously downloaded manuals.

This leaflet does not replace the full manual!

In the first detailed user manual there are protocols using our NucleoBond® RS columns for the isolation of 10, 50, 100, and 200 mg of highly pure plasmid DNA.

The NucleoBond® RS columns have been optimized in conjunction with the MN buffer chemistry to isolate plasmid DNA for use in processes with regulatory standards.

In the second detailed user manual there are protocols using our NucleoBond® RS columns for RNA Clean-up in a preparative scale.

Other buffers have not been tested and validated. Recommended reagents and consumables can be found in the user manual.

QR-Code Safety Data Sheet

Please find a digital version of the safety data sheets by following the link below:

www.mn-net.com/sds

We strongly recommend to carefully read the detailed protocol section of the product's user manual. If you have any questions about the protocol or product, please contact our Technical Support.
